Profession	**Professional mechanical engineer**
Education	2004 / 2005-2008 / 2009 Secondary Technical School - Machine technician for computer engineering. The main subject: Computer Interaction, grade 5, attended additional classes and prepared for the competition.
	2009 / 2010-2013 High Technical School of Vocational Studies - Professional Mechanical Engineer, Computer Mechanical Systems. The subjects that I was most interested in and where I ran the most were: Computer design (grade 9), Technological procedures (grade 10), Masine systems (grade 9), Masine structures (grade 9)

Knowlage and skills

* Education of professional engineers, for the needs of the mechanical engineering industry in Serbia, who are competent to quickly and efficiently model machine elements and contructions, generate technical documentation, prepare NC Work Processing Program, using the most powerful CAD / CAM packages and fabrication of parts on CNC machine tools.

* Computer-educated:

-building of modeling software (Creo-level 2D / 3D, AutoCad2013-entry level 3D / middle level 2D, ProEngineer-advanced level 2D / 3D). I started learning SolidWorks and 3DMax.

- Knowledge of Microsoft Office

Word - an advanced level, I know almost all the functions I use, if it happens that I find myself on some unknown, I quickly come to terms with this program.

Excel - I know basic functions, create tables and graphs, if any need expand their knowledge.

Power Point - an advanced level, I know that I'm making presentations for any purpose. I know all the functions that this program contains.

- OS Windows: I know that I'm installing the operating system, changing the hardware component, i.e. input and output devices. Software installation, updating and maintenance of the software.

- I'm able to quickly knock and use a blind typing.

*Broad education and general curiosity, developed logic and analytics.

*Programming websites in HTML and CSS. Bootstrap middle level, initial JavaScript level

Languages

*English

Knowledge of spoken and written English. The language I learn best through daily communication with foreigners (verbal and writing). I am able to quickly read and write in this language, as well as to conduct a conversation at a decent level. I have a rich fund to say.
